In the paper entitled “Sensitization to cockroach allergen: immune regulation and genetic determinants,” there was an error in Figure 4 and this is the correct form. In addition the author wishes to acknowledge that data was partially supported by NIH grants AI50024 (Kathleen C. Barnes) and HL087699 (Kathleen C. Barnes).

FIGURE 4: Overview of genomewide association study of cockroach sensitization in the African American population (Gao et al. JACI 2008; 121(2):S81). Manhattan plot showing the association by chromosome for cockroach sensitization versus $-\log_{10}P$ value. The x -axis represents genomic position, and the y -axis shows $-\log_{10}P$ value.
